

Available / Useable Module Formats

You can compile your code against a couple of common module formats. This determines, to which way of JS code splitting your TS code is compiled.

The following article gives a great overview and explanation:

<https://auth0.com/blog/javascript-module-systems-showdown/>

More on TS modules can be learned here:

<https://www.typescriptlang.org/docs/handbook/modules.html#code-generation-for-modules>
